

Tyler White - iOS Developer

Tyler is an award-winning iOS developer with over 10 years of iOS experience. He enjoys working with small teams and individuals to deliver high-quality iOS apps. He loves learning new technologies and tools to get the job done and finds fulfillment in working collaboratively with people who share similar passions for creativity, beauty, nature, health and joy.

Tyler is seeking a part time (20hrs/wk), remote iOS development project that is creative and helps people and the world in some way.

About Tyler

Tyler envisions a world where digital technologies bring us closer together and serves to uplift the health of us as individuals, families, local communities and a global species. He values setting clear expectations and often goes above and beyond by anticipating needs and calling out potential points of failure. He comes with a keen eye for aesthetics and problem solving. He thrives with goal-driven parameters, milestones and structures.

In his teams and clients, he requires clear and consistent communication, open-mindedness, attention to detail, follow through, integrity, reliability and play.

Tyler grew up in Santa Fe, New Mexico and began programming at 13 years of age. He is a visionary thinker and has an intuition that taps into the zeitgeist of the digital market to predict needs before those needs become conscious to public consumers.

Tyler enjoys spending time in nature, dancing, eating organic plant-based food, reading, learning, painting, guitar, and expression of all kinds! (including programming!)

Skills

Tyler is a multi-talented digital creative, entrepreneur, and seasoned developer with over 15 years of total programming experience and specializes in iOS development. He has in-depth experience using the essential iOS frameworks and services as well as some of the lesser used ones.

- Swift
- Objective-C
- iOS / MacOS Dev
- Xcode
- iPhone / iPad / iPod Touch
- UIKit

- MapKit / Location Services
- Core Animation
- App Store Connect
- Core Graphics
- SpriteKit

- SwiftUI
- WatchKit
- HealthKit
- Core Motion
- AVFoundation / Core Audio / Core Media
- Networking / io
- Asynchronous programming / Multithreading
- Profiling / Instruments / Performance

Tyler's Portfolio

Tyler has worked on many apps, websites and projects. Here are several of his most recent iOS apps.

Fetch Delivery - <http://Fetch.com>

2017 - 2019

Fetch is an app that will pick up and deliver nearly anything from nearly anywhere right to your door. Now live in Santa Fe, NM and coming soon to Boulder, CO.

Tyler developed the iOS app and assisted in system-wide architectural and design decisions as well as the organization's systems and process.

Tyler co-founded Fetch in 2017.

Mindflower - <http://MindflowerApp.com>

2016 - 2017

Mindflower is an interactive meditation using the physics of gravity, dark matter and stars. Trace strokes of color and sound across your canvas. Unwind, breathe deeply and listen. Your Mindflower moment will animate and unfold before your eyes.

Tyler conceived the concept, designed and programmed the app and website, filmed and edited the promo video, and collaborated with musical artist Alex Simon.

BounceChat - <http://BounceChat.com>

2014 - 2016

BounceChat is a revolutionary mobile platform connecting brands and bands with their communities and fans.

Tyler co-founded BounceChat with Gordon Schaeffer in Santa Fe, New Mexico to connect us with our community, place and the things we cherish most. As CTO, Tyler developed the iOS app, successfully raised angel investments, and worked with the tech team to assemble the technology used to run this cutting-edge location-based social network.

LEGO Art Maker

2013 - 2014

LEGO® Friends Art Maker is a fun and colorful art and creativity app for kids ages 5+. Create, paint, decorate and save your own Heart Cards and artwork with lots of details, colors, sparkles, stickers and bling!

Tyler worked with the teams at Cause Labs and LEGO as the lead iOS developer taking their static designs and bringing them to life by enabling kids to express themselves creatively with this high performance art rendering app.

Bible.is Kidz

2012 - 2013

Help your kids engage in the Bible as they listen to Scripture, interact with beautiful illustrations, find hidden objects, put together puzzles, and draw in the coloring book.

Tyler collaborated with Cause Labs and bible.is as the lead iOS developer to create an interactive and engaging app for kids.

Tyler's Awards & Press

- "Tech Bytes: Tyler White, A Man With Many Apps" - Santa Fe New Mexican
- Awarded 1st Place - \$40,000 Alcatel-Lucent iPad Challenge
- "Santa Fe's Digital Alchemist" - Santa Fe New Mexican
