

Tyler White - Senior iOS Developer

Tyler is a seasoned iOS developer with over 10 years of experience. He supports teams and individuals by delivering high-quality products using the latest languages and tools in software engineering.

Seeking: Remote iOS development and design work

Availability: Immediately, full or part-time

Contact: (505) 577-5300 or tylerwhitedesign@gmail.com

About

A wildly creative and passionate advocate of self and collective expression, Tyler envisions a world where digital technology brings us closer together, not further apart, and where we share in the joys of discovery and innovation.

Tyler grew up in Santa Fe, New Mexico and began programming at a young age surrounded by artists and entrepreneurs. He thrives with goal-driven parameters and milestones. He is also a visionary and recognizes the synergistic potential of collaboration with others.

Tyler fully enjoys nature, wellness, learning, and creating music.

- InDesign
- Ableton Live
- 3D Printing
- Laser Cutting
- Drone Pilot
- Photography / Video

Portfolio

Tyler has worked on over 50 apps, websites and projects. Here are several of his most recent iOS projects.

Fetch Delivery - <http://Fetch.com>

2017 - 2019

Fetch is an app that will pick up and deliver nearly anything from nearly anywhere right to your door. Now live in Santa Fe, NM and coming soon to Boulder, CO.

Tyler developed the iOS app and assisted in system-wide architectural and design decisions as well as the organization's systems and process.

Tyler co-founded Fetch in 2017.

Mindflower - <http://MindflowerApp.com>

2016 - 2017

Mindflower is an interactive meditation using the physics of gravity, dark matter and stars. Trace strokes of color and sound across your canvas. Unwind, breathe deeply and listen. Your Mindflower moment will animate and unfold before your eyes.

Tyler conceived the concept, designed and programmed the app and website, filmed and edited the promo video, and collaborated with musical artist Alex Simon.

BounceChat - <http://BounceChat.com>

2014 - 2016

BounceChat is a revolutionary mobile platform connecting brands and bands with their communities and fans.

Tyler co-founded BounceChat with Gordon Schaeffer in Santa Fe, New Mexico to connect us with our community, place and the things we cherish most. As CTO, Tyler developed the iOS app, successfully raised angel investments, and worked with the tech team to assemble the technology used to run this cutting-edge location-based social network.

LEGO Art Maker

2013 - 2014

LEGO® Friends Art Maker is a fun and colorful art and creativity app for kids ages 5+. Create, paint, decorate and save your own Heart Cards and artwork with lots of details, colors, sparkles, stickers and bling!

Tyler worked with the teams at Cause Labs and LEGO as the lead iOS developer taking their static designs and bringing them to life by enabling kids to express themselves creatively with this high performance art rendering app.

Bible.is Kidz

2012 - 2013

Help your kids engage in the Bible as they listen to Scripture, interact with beautiful illustrations, find hidden objects, put together puzzles, and draw in the coloring book.

Tyler collaborated with Cause Labs and bible.is as the lead iOS developer to create an interactive and engaging app for kids.
